Question	Blank 13
Current answer	tiled roofs
Suggested	red-tiled roofs
Highlighted	tiled roofs
Reason	AI suggested a different answer from the current accepted answer.
Evidence	famous world over for its view of distinctive red-tiled roofs.
Explanation	The area is famous worldwide for the distinctive red-tiled roofs found on its buildings.
Confidence	1.0

Cambridge 10 - Reading Test 1 | Q14 possibly_wrong

Test status	PUBLISHED
Section	EUROPEAN TRANSPORT SYSTEMS 1990-2010
Group	Questions 14-21
Type	READING_MATCHING_HEADINGS
Question	Paragraph A
Current answer	The escalating cost of rail transport
Suggested	The rapid growth of private transport
Highlighted	The escalating cost of rail transport
Reason	The paragraph discusses the growth of car use, not the cost of rail transport.
Evidence	the determining factor is the spectacular growth in car use.
Explanation	Paragraph A focuses on the massive increase in car ownership and usage across the EU.
Confidence	1.0

Cambridge 10 - Reading Test 1 | Q16 possibly_wrong

Test status	PUBLISHED
Section	EUROPEAN TRANSPORT SYSTEMS 1990-2010
Group	Questions 14-21
Type	READING_MATCHING_HEADINGS
Question	Paragraph C
Current answer	The rapid growth of private transport
Suggested	Transport trends in countries awaiting EU admission
Highlighted	The rapid growth of private transport
Reason	The paragraph specifically addresses candidate countries for EU entry, not general private transport growth.
Evidence	The strong economic growth expected in countries which are candidates for entry to the EU will also increase transport flows
Explanation	Paragraph C details the transport statistics and the shift from rail to road in countries applying for EU membership.
Confidence	1.0

Cambridge 10 - Reading Test 1 | Q19 possibly_wrong

Test status	PUBLISHED
Section	EUROPEAN TRANSPORT SYSTEMS 1990-2010
Group	Questions 14-21
Type	READING_MATCHING_HEADINGS
Question	Paragraph G
Current answer	The need to achieve transport rebalance
Suggested	Restricting road use through charging policies alone
Highlighted	The need to achieve transport rebalance
Reason	The paragraph describes a pricing-only approach; 'The need to achieve transport rebalance' is the example answer for Paragraph F.
Evidence	The first approach would consist of focusing on road transport solely through pricing.
Explanation	Paragraph G describes a strategy that relies solely on pricing road use without supporting other transport modes.
Confidence	1.0

Cambridge 10 - Reading Test 4 | Q22 possibly_wrong

Test status	PUBLISHED
Section	Second nature
Group	Questions 19-22
Type	READING_MATCHING_FEATURES
Question	It is possible to overcome shyness when faced with the need to speak in public.
Current answer	H
Suggested	A
Highlighted	H
Reason	The accepted answer 'H' is not in the options list (A-G). The text attributes overcoming shyness for public speaking to Christopher Peterson (Option A).
Evidence	Inherently introverted, he realised early on that as an academic, his reticence would prove disastrous in the lecture hall.
Explanation	Christopher Peterson, an introvert, learned to be more outgoing to succeed in his public role as an academic.
Confidence	1.0

Section	What destroyed the civilisation of Easter Island?
Group	Questions 26-26
Type	READING_SHORT_ANSWER
Question	Question 26
Current answer	REVIEW_REQUIRED
Suggested	valuable lessons
Highlighted	REVIEW_REQUIRED
Reason	The accepted answer is a placeholder and should be replaced with the correct phrase from the final paragraph.
Evidence	there are surely some valuable lessons which the world at large can learn from the story of Rapa Nui
Explanation	The passage concludes by stating that the story of Rapa Nui offers lessons that are of value to the entire world.
Confidence	0.9

Cambridge 11 - Reading Test 2 | Q26 possibly_wrong

Test status	DRAFT
Section	Neuroaesthetics
Group	Questions 27-30
Type	READING_MC_SINGLE
Question	Results of studies involving Robert Pepperell's pieces suggest that people
Current answer	B
Suggested	A
Highlighted	B
Reason	The text emphasizes the satisfaction (reward) of identifying representation (recognition), which matches Option A in standard materials. Option B is a factual observation of the study but not the primary suggestion about human behavior.
Evidence	the harder it is to decipher the meaning, the more rewarding is the moment of recognition
Explanation	The text explains that the brain finds the process of solving the 'puzzle' of an image rewarding once the meaning is recognized.
Confidence	0.9

Cambridge 11 - Reading Test 4 | Q5 possibly_wrong

Test status	DRAFT
Section	Research using twins
Group	Questions 5-9
Type	READING_SHORT_ANSWER
Question	Question 5
Current answer	REVIEW_REQUIRED
Suggested	Danielle Reed
Highlighted	REVIEW_REQUIRED
Reason	The current answer is a placeholder and the explanation provided describes Thomas Bouchard, who is the answer to a different question (Question 8).
Evidence	the latest work in epigenetics promises to take our understanding even further
Explanation	Danielle Reed expresses that the latest research in epigenetics will significantly advance our understanding of biology.
Confidence	1.0

Cambridge 11 - Reading Test 4 | Q6 possibly_wrong

Test status	DRAFT
Section	Research using twins
Group	Questions 5-9
Type	READING_SHORT_ANSWER
Question	Question 6
Current answer	REVIEW_REQUIRED
Suggested	Minnesota Study, Minnesota Study of Twins Reared Apart
Highlighted	REVIEW_REQUIRED
Reason	The accepted answer is a placeholder 'REVIEW_REQUIRED' and must be replaced with the specific study name mentioned in the text.
Evidence	what became known as the Minnesota Study of Twins Reared Apart
Explanation	The text identifies the research on twins who were separated at birth and lived apart as the Minnesota Study of Twins Reared Apart.
Confidence	1.0

Cambridge 11 - Reading Test 4 | Q7 possibly_wrong

Test status	DRAFT
Section	Research using twins
Group	Questions 5-9
Type	READING_SHORT_ANSWER
Question	Question 7
Current answer	REVIEW_REQUIRED
Suggested	15,000 questions
Highlighted	REVIEW_REQUIRED
Reason	The current answer is a placeholder 'REVIEW_REQUIRED' and should be updated to the specific figure mentioned in the text.
Evidence	they were each asked more than 15,000 questions
Explanation	The passage states that participants in the Minnesota Study of Twins Reared Apart were each required to answer more than 15,000 questions.
Confidence	1.0

Cambridge 11 - Reading Test 4 | Q8 possibly_wrong

Test status	DRAFT
Section	Research using twins
Group	Questions 5-9
Type	READING_SHORT_ANSWER
Question	Question 8
Current answer	REVIEW_REQUIRED
Suggested	Thomas Bouchard, B
Highlighted	Thomas Bouchard
Reason	The current answer is a placeholder 'REVIEW_REQUIRED'. The text identifies Thomas Bouchard as the researcher who conducted the study on twins reared apart.
Evidence	137 sets of twins eventually visited Thomas Bouchard's lab in what became known as the Minnesota Study of Twins Reared Apart.
Explanation	Thomas Bouchard led the Minnesota Study of Twins Reared Apart, which focused on identical twins who had been separated at birth.
Confidence	1.0

Cambridge 11 - Reading Test 4 | Q9 possibly_wrong

Test status	DRAFT
Section	Research using twins
Group	Questions 5-9
Type	READING_SHORT_ANSWER
Question	Question 9
Current answer	REVIEW_REQUIRED
Suggested	epigenetic processes, epigenetics
Highlighted	REVIEW_REQUIRED
Reason	The current accepted answer is a placeholder ('REVIEW_REQUIRED'). The text identifies 'epigenetic processes' as the third component.
Evidence	Epigenetic processes are chemical reactions tied to neither nature nor nurture but representing what researchers have called a 'third component'.
Explanation	The passage explicitly names 'epigenetic processes' as the 'third component' that works alongside nature and nurture to shape who we are.
Confidence	1.0

Section	Building the Skyline: The Birth and Growth of Manhattan's Skyscrapers
Group	Questions 22-26
Type	READING_SENTENCE_COMPLETION
Question	. One advantage of palm oil for manufacturers is that it stays even when not refrigerated. 24. The is the best known of the animals suffering habitat loss as a result of the spread of oil palm plantations. 25. As one of its criteria for the certification of sustainable palm oil, the RSPO insists that growers check on a routine basis. 26. Ellwood and his researchers are looking into whether the bird's nest fern could restore in areas where oil palm trees are grown.  Bài đọc passage 3 Building the Skyline: The Birth and Growth of Manhattan's Skyscrapers Katharine L. Shester reviews a book by Jason Barr about the development of New York City In Building the Skyline, Jason Barr takes the reader through a detailed history of New York City. The book combines geology, history, economics, and a lot of data to explain why business clusters developed where they did and how the early decisions of workers and firms shaped the skyline we see today. Building the Skyline is organized into two distinct parts. The first is primarily historical and addresses New York's settlement and growth from 1609 to 1900; the second deals primarily with the 20th century and is a compilation of chapters commenting on different aspects of New York's urban development. The tone and organization of the book changes somewhat between the first and second parts, as the latter chapters incorporate aspects of Barr's related research papers. Barr begins chapter one by taking the reader on a 'helicopter time-machine' ride – giving a fascinating account of how the New York landscape in 1609 might have looked from the sky. He then moves on to a subterranean walking tour of the city, indicating the location of rock and water below the subsoil, before taking the reader back to the surface. His love of the city comes through as he describes various fun facts about the location of the New York residence of early 19th-century vice-president Aaron Burr as well as a number of legends about the city. Chapters two and three take the reader up to the Civil War (1861-1865), with chapter two focusing on the early development of land and the implementation of a grid system in 1811. Chapter three focuses on land use before the Civil War. Both chapters are informative and well researched and set the stage for the economic analysis that comes later in the book. I would have liked Barr to expand upon his claim that existing tenements* prevented skyscrapers in certain neighborhoods because 'likely no skyscraper developer was interested in performing the necessary "slum clearance"'. Later in the book, Barr makes the claim that the depth of bedrock was not a limiting factor for developers, as foundation costs were a small fraction of the cost of development. At first glance, it is not obvious why slum clearance would be limiting, while more expensive foundations would not. Chapter four focuses on immigration and the location of neighborhoods and tenements in the late 19th century. Barr identifies four primary immigrant enclaves and analyses their locations in terms of the amenities available in the area. Most of these enclaves were located on the least valuable land, between the industries located on the waterfront and the wealthy neighborhoods bordering Central Park. Part two of the book begins with a discussion of the economics of skyscraper height. In chapter five, Barr distinguishes between engineering height, economic height, and developer height – where engineering height is the tallest building that can be safely made at a given time, economic height is the height that is most efficient from society's point of view, and developer height is the actual height chosen by the developer, who is attempting to maximize return on investment. Chapter five also has an interesting discussion of the technological advances that led to the construction of skyscrapers. For example, the introduction of iron and steel skeletal frames made thick, load-bearing walls unnecessary, expanding the usable square footage of buildings and increasing the use of windows and availability of natural light. Chapter six then presents data on building height throughout the 20th century and uses regression analysis to 'predict' building construction. While less technical than the research paper on which the chapter is based, it is probably more technical than would be preferred by a general audience. Chapter seven tackles the 'bedrock myth', the assumption that the absence of bedrock close to the surface between Downtown and Midtown New York is the reason for skyscrapers not being built between the two urban centers. Rather, Barr argues that while deeper bedrock does increase foundation costs, these costs were neither prohibitively high nor were they large compared to the overall cost of building a skyscraper. What I enjoyed the most about this chapter was Barr's discussion of how foundations are actually built. He describes the use of caissons, which enable workers to dig down for considerable distances, often below the water table, until they reach bedrock. Barr's thorough technological history discusses not only how caissons work, but also the dangers involved. While this chapter references empirical research papers, it is a relatively easy read. Chapters eight and nine focus on the birth of Midtown and the building boom of the 1920s. Chapter eight contains lengthy discussions of urban economic theory that may serve as a distraction to readers primarily interested in New York. However, they would be well-suited for undergraduates learning about the economics of cities. In the next chapter, Barr considers two of the primary explanations for the building boom of the 1920s – the first being exuberance, and the second being financing. He uses data to assess the viability of these two explanations and finds that supply and demand factors explain much of the development of the 1920s; though it enable the boom, cheap credit was not, he argues, the primary cause. In the final chapter (chapter 10), Barr discusses another of his empirical papers that estimates Manhattan land values from the mid-19th century to the present day. The data work that went into these estimations is particularly impressive. Toward the end of the chapter, Barr assesses 'whether skyscrapers are a cause or an effect of high land values'. He finds that changes in land values predict future building height, but the reverse is not true. The book ends with an epilogue, in which Barr discusses the impact of climate change on the city and makes policy suggestions for New York going forward. ————— * a tenement: a multi-occupancy building of any sort, but particularly a run-down apartment building or slum building bedrock: the solid, hard rock in the ground that lies under a loose layer of soil. ? Câu hỏi passage 3
Current answer	solid
Suggested	solid
Highlighted	solid
Reason	The provided source text is for 'Building the Skyline' (Passage 3), but the questions are about 'Palm Oil' (Passage 2).
Evidence	
Explanation	Palm oil is preferred by manufacturers because it remains in a solid state at room temperature, eliminating the need for refrigeration.

Highlighted	D
Reason	Question 24 is a short-answer question; 'D' is a paragraph label, but the answer is a specific term found in paragraph F.
Evidence	Psychologists can also help athletes change how they see their physiological responses
Explanation	Paragraph F explains that psychologists can help athletes view a high heart rate as excitement rather than nerves.
Confidence	0.95

Cambridge 19 - Reading Test 2 | Q26 possibly_wrong

Test status	DRAFT
Section	Athletes and stress
Group	Questions 24-26
Type	READING_SHORT_ANSWER
Question	Question 26
Current answer	E
Suggested	scoring athletes
Highlighted	E
Reason	Question 26 is a short-answer question; 'E' is a paragraph label, but the answer is a specific activity found in paragraph F.
Evidence	scoring athletes against their peers to create a sense of competition
Explanation	Paragraph F suggests that scoring athletes against their peers in training helps recreate competitive pressure.
Confidence	0.95

Cambridge 20 - Reading Test 1 | Q14 possibly_wrong

Test status	PUBLISHED
Section	To Britain
Group	Questions 14-18
Type	READING_MATCHING_INFORMATION
Question	reference to the research problems that arise from there being only a few surviving large elms
Current answer	C
Suggested	D
Highlighted	C
Reason	The accepted answer C mentions the existence of survivors, but Paragraph D specifically discusses the research problems caused by their small numbers.
Evidence	opportunities are limited as the number of these mature survivors is relatively small.
Explanation	Paragraph D explains that research is difficult because the number of surviving mature trees available for study is very small.
Confidence	0.95

Cambridge 20 - Reading Test 1 | Q15 possibly_wrong

Test status	PUBLISHED
Section	To Britain
Group	Questions 14-18
Type	READING_MATCHING_INFORMATION
Question	details of a difference of opinion about the value of reintroducing elms to Britain
Current answer	G
Suggested	H
Highlighted	G
Reason	Paragraph G describes the breeding process, while Paragraph H contains the actual details of the difference of opinion regarding reintroduction.
Evidence	Others are more wary. 'On the face of it, it seems like a good idea,' says Elliot.
Explanation	Paragraph H presents the conflicting views of Karen Russell, who supports reintroduction, and Matt Elliot, who is more cautious about the risks.
Confidence	0.95

Cambridge 20 - Reading Test 1 | Q17 possibly_wrong

Test status	PUBLISHED
Section	To Britain
Group	Questions 14-18
Type	READING_MATCHING_INFORMATION
Question	a description of the conditions that have enabled a location in Britain to escape Dutch elm disease
Current answer	E
Suggested	F
Highlighted	E
Reason	Paragraph E discusses the historical uses of elm wood, whereas Paragraph F describes the specific conditions (sea winds) that protected Brighton.
Evidence	Strong winds from the sea make it difficult for the determined elm bark beetle to attack this coastal city's elm population.
Explanation	Paragraph F describes how the coastal winds in Brighton prevent beetles from attacking the local elm trees.
Confidence	0.95

Cleaner, Abundant Fuels Attracting Record Investment - Test 25 | Q23 possibly_wrong

Test status	PUBLISHED
Section	A guide to womenomics
Group	
Type	READING_MC_SINGLE
Question	Since 1950, the percentage of
Current answer	C
Suggested	B
Highlighted	C
Reason	The text explicitly states men's employment rate 'slid' (decreased), whereas there is no mention of stability for Japanese or Italian women.
Evidence	Since 1950, men's employment rate has slid by 12 percentage points
Explanation	The text states that men's employment rate has decreased since 1950, which matches option B, while there is no evidence that Japanese and Italian women's employment remained stable.
Confidence	1.0

Cleaner, Abundant Fuels Attracting Record Investment - Test 25 | Q33 possibly_wrong

Test status	PUBLISHED
Section	A Library At Your Fingertips
Group	
Type	READING_SENTENCE_COMPLETION
Question	Blank 33
Current answer	retails and publishers
Suggested	retailers and publishers
Highlighted	retails and publishers
Reason	The accepted answer uses the word 'retails' (a verb or noun for the activity) instead of 'retailers' (the people/companies) as written in the source text.
Evidence	Both retailers and publishers believe they will eventually persuade consumers to do much more of their reading online.
Explanation	The text states that both groups involved in selling and producing books believe they can convince readers to switch to digital formats.
Confidence	0.95

Cleaner, Abundant Fuels Attracting Record Investment - Test 25 | Q38 possibly_wrong

Test status	PUBLISHED
Section	A Library At Your Fingertips
Group	
Type	READING_TRUE_FALSE_NOT_GIVEN
Question	Microsoft signed a deal with the British Library on the same day as Google and Amazon made their announcements.
Current answer	FALSE
Suggested	TRUE
Highlighted	FALSE
Reason	The text confirms the timing of Microsoft's announcement was the same day as Google and Amazon, contradicting the FALSE key.
Evidence	On Thursday — coincidentally the same day that Google and Amazon announced their initiatives — Microsoft released details of a deal
Explanation	The text states that Microsoft released details of its deal on the same Thursday that Google and Amazon announced their initiatives.
Confidence	0.9

Fear of the Unknown | Q6 possibly_wrong

Test status	ARCHIVED
Section	Fear of the Unknown
Group	Question Group 1
Type	READING_MATCHING_INFORMATION
Question	The reasons why innovation is easier in smaller companies
Current answer	G
Suggested	D
Highlighted	G
Reason	Paragraph G discusses general cultural requirements for innovation, whereas Paragraph D explicitly identifies size as the reason why innovation is easier in smaller units.
Evidence	In the management of creativity, size is your enemy
Explanation	Paragraph D explicitly states that 'size is your enemy' in managing creativity, providing a specific reason why smaller units or companies are more effective for innovation.
Confidence	0.8

Fear of the Unknown - Test 1 | Q6 possibly_wrong

Test status	PUBLISHED
Section	Fear of the Unknown
Group	Question Group 1
Type	READING_MATCHING_INFORMATION
Question	The reasons why innovation is easier in smaller companies
Current answer	G
Suggested	E
Highlighted	G
Reason	Paragraph G does not mention smaller companies; Paragraph E explicitly explains why innovation is easier outside large firms.
Evidence	It is easier for ideas to develop outside big firms these days.
Explanation	Paragraph G discusses general culture and leadership but does not explain why innovation is easier in small firms. Paragraph E explicitly states it is easier outside big firms due to bank loans.
Confidence	0.9

How deserts are formed - Test 32 | Q10 possibly_wrong

Test status	PUBLISHED
Section	How deserts are formed
Group	
Type	READING_TRUE_FALSE_NOT_GIVEN
Question	The most common cause of desertification is the lack of rainfall.
Current answer	TRUE
Suggested	FALSE
Highlighted	TRUE
Reason	The text states that rainfall causing desertification is a misunderstanding and that human activities are responsible 'more often than not'.
Evidence	A common misunderstanding is that a shortage of precipitation causes the desertification
Explanation	The text explicitly calls the idea that rainfall shortage causes desertification a "misunderstanding" and identifies human activities as the actual cause.
Confidence	1.0

How deserts are formed - Test 32 | Q11 possibly_wrong

Test status	PUBLISHED
Section	How deserts are formed
Group	
Type	READING_TRUE_FALSE_NOT_GIVEN
Question	Farming animals in semi-arid areas will increase soil erosion.
Current answer	FALSE
Suggested	TRUE
Highlighted	FALSE
Reason	The text says livestock farming 'accelerates' erosion, which means it increases it, contradicting the 'FALSE' answer.
Evidence	Livestock farming in semi-arid areas accelerates the erosion of soil
Explanation	The passage states that livestock farming in semi-arid areas accelerates (increases) soil erosion.
Confidence	1.0

How deserts are formed - Test 32 | Q12 possibly_wrong

Test status	PUBLISHED
Section	How deserts are formed
Group	
Type	READING_TRUE_FALSE_NOT_GIVEN
Question	People in Asian countries no longer use firewood as the chief fuel.
Current answer	NOT GIVEN
Suggested	FALSE
Highlighted	NOT GIVEN
Reason	The text uses the present tense 'is' to describe firewood as the chief fuel, which contradicts the statement that they no longer use it.
Evidence	In many Asian countries, firewood is the chief fuel used for cooking and heating
Explanation	The text states that firewood 'is' the chief fuel in many Asian countries, which directly contradicts the claim that they 'no longer use' it.
Confidence	0.9

Reiki - Test 26 | Q20 possibly_wrong

Test status	DRAFT
Section	Sculpture
Group	REGIONAL AFRICAN ART
Type	READING_NOTE_COMPLETION
Question	Blank 20
Current answer	Religious rituals
Suggested	rituals
Highlighted	Religious rituals
Reason	The instruction specifies ONE WORD ONLY, but the accepted answer is two words.
Evidence	such sculptures being traditionally used in religious rituals
Explanation	The text says these sculptures were used in religious rituals, but the instruction limits the answer to one word.
Confidence	1.0

Reiki - Test 26 | Q28 possibly_wrong

Test status	DRAFT
Section	Genealogy
Group	
Type	READING_MATCHING_HEADINGS
Question	Paragraph A
Current answer	
Suggested	Diversity of Application
Highlighted	Diversity of Application
Reason	The accepted answer is empty. 'Diversity of Application' is the correct heading as the paragraph describes the modern popularity and various ways people engage with genealogy.
Evidence	
Explanation	Paragraph A introduces genealogy as a popular hobby for non-specialists and mentions the various ways it is accessed today, such as the internet and societies.
Confidence	0.95

Reiki - Test 26 | Q29 possibly_wrong
